

AgileBCP Consultants

1 Opportunity AgileBCP Pty Ltd is pleased to announce the global availability of our commission arrangements for consultants who facilitate subscriptions to our Agile Business Continuity Software as a Service Platform.

2 Why AgileBCP What differentiates our globally available SaaS is alignment with “Best Practice” as it is harmonized with International Standards. What marks it as a leader in the field is that it is risk-based - focused on the vulnerability of the things you care about - not only on the impact of extreme events - therefore opening up prevention opportunities.

3 Registration* Email your details to consulting@agilebcp.com - we will then add you to the AgileBCP Consultants listing on AgileBCP site.

4 Methodology A range of resources is available from across our sites to support facilitators mentoring clients.

www.disasterresilience.com

www.businesshazards.com

Other facilitation tools include a range of Apple and Android apps.

Workshops - free or charge on platforms of your choice (example - www.eventbookings.com - virtual or face to face on site)

If you determine to use a subscription to promote and develop solutions for potential clients, we will support you with a 50% rebate on your preferred demonstration model (which is generally used by you to model and populate potential client data). A suitable version to facilitate a small team of stakeholder clients (such as their risk management team, or their executives) is the “up to five” model. In other contexts it is more appropriate to facilitate a group of up to twenty (covering crucial activities supporting “must deliver” products and services).

5 Remuneration The rate - as ongoing commissions - is set at 30% of the facilitated subscriptions.

6 Insurances All independent freelancers will be responsible to carry own indemnities (which are generally inexpensive as they cover training and facilitation).
